DETAILED ACTION

1. The disclosure is objected to because of the following informalities:
 - a. In the following Claims, "being for" is grammatically incorrect, and does not aid in comprehension:
Claim 1, third and fourth paragraphs,
Claim 7,
Claim 15, third, fourth and ninth paragraphs.
 - b. In Claims 1 and 15, line 2, "themselves" is grammatically incorrect;
"himself/herself" is a possible amendment.
 - c. In Claim 12, last lines, "is drawn when said lever member is actuated by the user" is unclear in light of the preceding language.
 - d. In Claim 14, "rotational speed" lacks antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Tidcomb 6158757.

Tidcomb discloses a wheelchair apparatus 100 for permitting a user to propel his/herself through arm movement, comprising

Chair member (inherent) for supporting the user, including
seat and frame portion (both inherent),
at least one drive wheel 52 coupled to the frame portion,
at least one support wheel (unidentified in fig 1, smaller wheel near footrest),
at least one lever assembly (fig 2) coupled to the drive wheel and chair member,
for rotating the drive wheel,

Art Unit: 3611

the lever assembly having lever 102 pivotally coupled to the frame portion,
and cable 150 coupled between the lever and drive wheel, the cable rotating the drive wheel (fig 2), and,

Clutch means 54 coupled between the cable and drive wheel (fig 2), the clutch engaging/disengaging the drive wheel (col 9, last paragraph).

3. ALLOWABLE SUBJECT MATTER

a. **Claims 4-9 and 11-14** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, and upon resolution of any objections.

b. **Claims 15 is allowable** upon resolution of any objections.

Prior art does not disclose a wheelchair apparatus for propelling the user through arm movement comprising, *inter alia*, a lever, a clutch bias coupled to the clutch, the bias being tensed/recoiling from being tensed when the lever is used, a gearing assembly with motor and processing assembly.

4. The prior art made of record, and not relied upon, is pertinent to this disclosure, in addition to that listed on the IDS filed 2/15/02: Korosue 6247715, Drake 5941547, Harris et al 5020815, Beumer 5167168, Brubaker et al 4840076, Horn 4811964, Seol 4762332.
